## The Story

We opened our doors and started our business on 9 September 1999, under the entity of **PT Kapal Kayu Nusantara**, by setting up and operating a small boatyard that built non-conventional wooden boats. In 2000, we built our first boat to tackle the challenge. Boat building was our entry point to the maritime business world. The boatyard itself was an answer to the importance of the building stage as an integral part of the overall process that leads to the marine vessel related activities.

By the year 2005, experience, valuable learning processes, work results and wide networks allowed us to transform ourselves into a service company that proudly provides marine vessel design, building, maintenance, and repair related services.

On 12 January 2009, our entity was renamed into **PT Kakanoo Marine Indonesia**, and by the year 2016 renamed again into **PT Kakanoo Maritim Nusantara**, a refreshing new identity that will bring into a further journey toward our vision.

## Vision

To be a leading and profitable national enterprise that provides professional naval architecture and marine vessel building related services, through competence, strong network and partnerships, to deliver best results that satisfy our credible customers.

## Mission

Practice good human resources, marketing and financial management in all our activities, supported by an efficient IT system, oriented towards the organization's development and welfare and improvement in its surrounding environment;

Keep updating our knowledge and skills with the latest developments in the environment that affects our field of work in order to gain profit by providing reliable services and delivering top-of-the-line products;

Form strategic partnerships and alliances in order to initiate an innovative value-oriented marine industry community;

Be able to identify, locate, reach and access credible customers

**Area of Competence :**

- Hull & construction design
- 
- Hull & construction building method and technology
- 
- Marine electrical system
- 
- Marine mechanical system
- 
- Marine machinery and propulsion system
- 
- Marine Interior & Exterior Design

Nov 2019

**Services :**

- 2D and 3D Drawings  
(lines plan, general arrangement, interior/exterior profile, etc.)
- 
- Technical Calculation  
(stability, hydrostatic, powering, etc.)
- 
- 3D Visualization  
(exterior, interior, engine room, etc.)
- 
- Technical Reports  
(technical assessments,  
technical recommendations, etc.)

**Solutions :**

- Marine Vessel Custom Design Solution  
(hull shape, construction, styling, general  
arrangement, etc.)
- 
- Marine Vessel Modification Design and  
Engineering Solution  
(hull and construction modification, capacity  
upgrade, re-layout, etc.)
- 
- Marine Vessel System Design Solution  
(machinery, mechanical and electrical)
- 
- Marine Interior & Exterior Design Solution
- 
- Marine Vessel Building, Maintenance and  
Repair
- Project Management Solution  
(initiation, planning, execution, control and  
monitoring, ending)

## How We Operate

- We have two kinds of valuable assets :
- Our own experience and competence
  - Our vast network and pool of talent within the industry

Depends on each case and situation, upon clients' needs and requests, we either utilize our own internal assets or we mobilize, manage, and organize assets from our local, regional, and global network of professionals and organizations to perform the work.

For us, what matter the most is to get the job done!
